MAKES HARD WORK EASY.

OUTRIGHT 770 spray adjuvant delivers a powerful triple-action solution for your spray program. Ammonium Sulphate neutralises hard water minerals like calcium and magnesium, and HASTEN penetrating oil breaches waxy weed barriers to accelerate uptake, while non-ionic surfactants ensure spray droplets spread and stick for maximum coverage.

1

AMMONIUM SULPHATE CONDITIONS HARD WATER

Ammonium sulphate neutralises minerals, like calcium and magnesium, preventing them from binding to the herbicide and compromising its performance.

2

HASTEN PENETRATING OIL ENHANCES HERBICIDE PENETRATION

Powered by HASTEN technology, to help herbicides breach waxy weed barriers and maximise uptake.

3

NON-IONIC SURFACTANTS IMPROVES SPREAD AND ADHESION

OUTRIGHT 770's non-ionic surfactants maximise weed surface coverage, ensuring herbicides spread evenly and adhere to the target.

Source VCC-24-06-01 Greenhouse Pot Trial conducted by Plant Science Consulting 2024

Recent greenhouse pot trials evaluated the efficacy of Glyphosate when combined with OUTRIGHT 770 and a range of other adjuvants under hard water conditions on susceptible annual ryegrass.

OUTRIGHT 770 demonstrated significantly greater control of annual ryegrass under increasing hard water conditions when compared with untreated specimens and other adjuvant type products.
